Forecast for Sunday 03 Nov 2024

Weather: Overcast start to the day with outbreaks of drizzle. Extensive cloud trapped beneath an inversion that lies just above the height of the highest summits in the park. Cloud lingering throughout the day but mostly dry during the afternoon, although the risk of some patchy drizzle continues. A few brighter spells may develop in the west later, but this is considered low confidence.

Chance of cloud-free hill tops above 600m: 30%, rising to 50% in the west during the afternoon.

Low cloud and visibility: Widely overcast below about 1000m, with bases of 500-700m. Bases lifting slightly during the afternoon, lifting clear of lower routes and ridges. Some breaks developing in the west later. Visibility moderate to poor in drizzle, otherwise good outside of any cloud.

Forecast for Monday 04 Nov 2024
Weather: Rather cloudy start following the clearance of any overnight valley fog or early light drizzle. Variable cloud amounts across west Wales where bright and sunny spells are expected at times. Remaining cooler and cloudier across eastern slopes with some patchy drizzle. Chance of overnight mist and hill fog Monday night.

Maximum wind: East to southeasterly 5-10mph, gusts to 15mph
Chance of cloud-free hill tops 600m: 20% improving 60% during the afternoon

Low cloud and visibility: Cloud bases around 500m to start, but down to lower slopes around 300m in the east. Variable cloud amounts in the west later with bases above 800m. Visibility generally good outside of cloud, moderate to poor in any drizzle. Poor to very poor in mist and fog overnight.

Temperature: **Valleys:** Plus 9 to 12 Celsius
At 600m: Plus 5 Celsius
Freezing level: Above summits
